Grading Rubric

Grading Rubic

Problems are graded using the following rubric:

- the solution provides at its beginning the necessary knowns
- the solution provides the necessary formulas
- the solution shows organized work
- the solution is readable
- the solution is accurate
- the solution is properly formatted

Programs are graded using the following rubric:

- the program compiles
- the program is readable
- the program is accurate
- the program produces properly formatted results
- the program uses only acceptable resources
- the program performs required task(s)
- the program handles all possible inputs

The weights of the requirements depend on the type of problem or project; however, if a program fails to compile, it will not be graded.

Labs

A lab submission must be completed during the assigned class period and within the designated time frame, unless the professor states otherwise. Some labs are divided into cumulative parts; completing a later part may require redoing an earlier one, but the grade for the earlier part will not be updated as a result. Each lab is worth 5 points. **Late submissions will be penalized 0.5 points per day late, though penalties will not reduce a grade below 1 point, nor will they be applied to grades already below 1 point.**

Homework

Homework will be divided among 5 packages, each containing at most 5 exercise assignments. Only assignments completed by the due date of their package will be graded. **Late work will be accepted.**

Project

The project will be a report and source codes, which will be peer reviewed by fellow students. Additional instructions will be provided in the project instructions.

Extra Credit

Extra credit will be provided as an extra question(s) on labs, exercises, and quizzes. All extra credit work must be accurate and submitted on the date it is assigned to receive its points. A maximum of 10 points will be awarded. **Any form of academic dishonesty will result in a zero on the disputed assessment and all extra credit earned being voided. Likewise, earning additional extra credit and doing revisions, if any, will be prohibited.**

Absentee Assessment

All assessments, excluding exams and the project, have a submission grace period extending to the end of the day. For an additional extended grace period, the professor **must** be notified in writing at least 2 hours before the scheduled class of the assessment's due date, and the professor **must** provide written permission approving the later submission date. Exams and the project cannot be submitted on a later date, but they may be completed early, before the scheduled date.

Final Grade

At the end of the semester, your final grade will be determined by taking the ceiling of the total points you earned, and then using the table below to assign you a letter grade.

Grading Scale			
97	–	100	A+
93	–	96	A
90	–	92	A−
87	–	89	B+
83	–	86	B
80	–	82	B−
77	–	79	C+
70	–	76	C
67	–	69	D+
63	–	66	D
60	–	62	D−
0	–	59	F

Your final total is out of 100 points. **If you earn 80 points before the final exam, you will be exempt from taking the final exam and will receive an A if your earning is between 80 and 83 or an A+ if it is greater than 83 for your final grade**.
